Klean Kanteen™: the Original Stainless Steel Bottle

In 2004 Klean Kanteen™ introduced the first personal hydration bottle made from stainless steel to give health and environmentally conscious people an alternative to plastic. We have yet to see another bottle company, stainless or otherwise, that makes a product comparable to these high quality, handcrafted bottles or that commits to strong environmental and labor standards.

It's the healthiest, safest bottle you can buy.

Klean Kanteens have always been made from toxin-free materials, with large-mouth and rounded corners and threads so they're easy to clean. We also offer all-stainless cap options in all bottle styles.
