

NOVEMBER SPECIAL 2009

15%
OFF

In the Spirit of the Season... we are offering you **15% OFF** **Klean Kanteen Wine Karafes**

Your Pinot Gris will never know you were drinking a Zinfandel yesterday.

The Wine Karafe™ was designed to hold a standard, 750ml bottle of wine and is made from high quality, 18/8, food-grade stainless steel that's totally free of BPA and other toxins. Because stainless steel itself is safe, we don't need to coat the inside of the bottle with a plastic or epoxy lining, which is one of the main differences between a stainless steel Klean Kanteen™ and aluminum bottles.

Food-grade stainless steel is used in the brewing, food and winemaking industries too. It's the material of choice because it doesn't retain or impart flavors. No matter how many times you refill it, no matter what you put into it, your Klean Kanteen™ will keep your drinks fresh, crisp and clean tasting. All our caps are BPA-free too, and we offer stainless steel options for Classic bottles as well.
